EXPERIENCE & PROJECTS

Flutter Developer

3I Vision

May 2025 - Present Giza, Egypt (Hybrid)

- Delivered AI-driven mobile apps for people detection and license plate recognition.
- Improved startup performance by 30% through optimization and lazy-loading strategy.
- Applied Clean Architecture with offline-first design using Hive/SQLite and Firebase synchronization.
- Key projects: 3I Vision App, DataMind Agent, Aramco App (Private), Adahi.

3I Vision App: [App Store](#) | [Play Store](#)

DataMind Agent: [App Store](#) | [Play Store](#)

Aramco App (Private): Saudi Aramco data management; sample registration, camera scanning, SQLite, Excel export, Zebra integration.

Adahi: Smart Eid al-Adha companion for checking Udhiyah suitability by identifying illness/disqualification signs according to Islamic guidelines. [Play Store](#)

Software Engineer

Cogens

Jul 2025 - Present Canada (Remote)

- Scaled a multi-app school ecosystem (Parent, Student, Staff, Bus, Admin, Vendor).
- Built Django multi-tenant backend, real-time notifications, and billing/report workflows.
- Implemented token/JWT auth, role-based access, and standardized API contracts across modules.
- Team work with Abdalrhman Reda on Muslim Association of Canada apps: MAC Convention (conference booking & registration) and MAC Work (internal staff app), alongside MACLINK.
- Key projects: Cogens Parent, Cogens Student, Cogens Staff, Cogens Bus Driver, MACLINK, MAC Convention, MAC Work.

Cogens Parent: [App Store](#) | [Play Store](#)

Cogens Student: [App Store](#) | [Play Store](#)

Cogens Staff: [App Store](#) | [Play Store](#)

Cogens Bus Driver: [App Store](#) | [Play Store](#)

MACLINK: [App Store](#) | [Play Store](#)

MAC Convention (team): [App Store](#) | [Play Store](#)

MAC Work (team): [App Store](#) | [Play Store](#)

Software Engineer (Freelance)

Self-Employed

Jan 2022 - Present Remote

- Shipped production apps with maps, live tracking, localization, and secure payment flows.
- Integrated backend services and deployment pipelines for end-to-end delivery.
- Mksaby (built solo, end-to-end): Arabic-first, offline-first shop sales & inventory app; feature-first Clean Architecture, BLoC, Drift (22 synced tables) with outbox sync to Firestore, phone/WhatsApp OTP, PDF invoices, granular employee permissions, Sentry, Patrol E2E and ~229 unit/widget test files.
- Snippet (performance optimization): image & video compression, video thumbnail generation, play-on-open feed videos, and image caching across feeds and stories for media-heavy screens.
- Alarmiq & Yusr (co-developed with Abdalrhman Reda): smart alarm suite (interval batch alarms, GPS trip alarm, world clock, timers) and an Islamic companion (Quran & tafsir, prayer times, Qibla, Prophet's biography).
- Key projects: Mksaby, Snippet, Alarmiq, Yusr (formerly Noon), Aman, Yalla L3b.

SUMMARY

Software Engineer with 4+ years of experience building scalable, high-performance mobile and backend systems, with 16 apps published on the App Store and Google Play. Specialized in Flutter and Python (Django, FastAPI, Flask), with strong ownership of architecture, deployment, and production quality. Completed Senior / Lead training in system design, database & ORM performance, offline-first sync, observability, testing strategy, ADRs, incident handling, and mentoring.

SKILLS

Languages: Dart, Python, JavaScript, C++, C#, PHP, R, GDScript

Mobile: Flutter, Dart, Android, iOS, Bloc/Cubit, Riverpod, Provider, Responsive UI, Localization (RTL), Debugging, SDLC

Backend: Python, Django/DRF, FastAPI, Flask, Node.js/Express, REST APIs, GraphQL

Data: PostgreSQL, MySQL, SQLite/Sqflite, Hive, Drift, Firestore, MongoDB, Offline-first Sync

Testing: Unit, Widget, Integration (Patrol E2E)

DevOps: Docker, Nginx, CI/CD, GitHub Actions, Codemagic, Fastlane, TestFlight, Store Deployment

Platform: FCM Push, Google Maps SDK, In-App Purchases, HLS Streaming, Media Compression, Sentry

Senior / Lead: System Design, DB Indexing & Query Optimization, Transactions & Concurrency, Caching, API Design, Security (AuthN/AuthZ, JWT, SQLi/XSS), Observability, SOLID & Design Patterns, ADRs, Estimation, Incident Postmortems, Mentoring

Other: Godot, Unity, Figma, Material Design, Animations, Agile/Scrum

Cloud & Hosting: Firebase (Auth, FCM, Firestore), AWS (EC2/S3 basics), Hetzner Cloud (VPS)

Mksaby (solo): [Play Store](#)
Snippet (performance): [Play Store](#)
Alarmiq (co-developed): [App Store](#) | [Play Store](#)
Yusr (co-developed): [App Store](#) | [Play Store](#)
Aman: [App Store](#) | [Play Store](#)
Yalla L3b: [Play Store](#)

 EDUCATION

 **B.Sc. in Computer Science - Cairo University**
2017 - 2022

 CERTIFICATIONS

-  The Complete Flutter & Dart - Udemy (2022)
-  Multi-Modular & Clean Architecture - Udemy (2021)
-  **Senior / Lead Training - completed:** 30 lessons across 6 tracks: Django backend in depth, Flutter in depth, System Design, DevOps & Production, Code Quality, and Lead Skills.

Domain (Cogens): Education Systems Management

Domain (3I Vision Watch Area): AI-Powered Computer Vision + ERP + IoT for Security, Automation, and Analytics Solutions

Domain (Freelance): Transportation & Booking Systems Management, Retail POS & Inventory, Social Media, Productivity

- Clean Architecture
- Performance
- AI Integration
- End-to-End Delivery

Soft Skills

- Communication
- Client Communication
- Stakeholder Management
- Problem Solving
- Team Collaboration
- Ownership
- Adaptability
- Time Management

 LANGUAGES

-  Arabic - Native
-  English - Fluent
-  French - Intermediate
